Jabu Kekana

SOFTWARE DEVELOPER

OBJECTIVE

Dedicated to leveraging my skills in Software Development, Artificial Intelligence research & Cloud Computing to contribute to dynamic teams. Eager to apply my expertise in transforming traditional workflows into agile, data-driven operations through systematic integration of technology, fostering enhanced collaboration & achieving shared objectives.

EXPERIENCE

JUNIOR SOFTWARE DEVELOPER

June 2023 – Present / Qurtuba Online Academy

I actively engage in software development using diverse programming languages & frameworks. Additionally, I contribute to Artificial Intelligence & Machine Learning research, employing advanced models like LangChain.js, Open AI, & TensorFlow.js. My responsibilities also encompass the administration of Microsoft Azure Active Directory & Google Workspace, showcasing proficiency in IT infrastructure management & cloud computing.

FREELANCE WEB DEVELOPER

May 2022 – Present / Self Employed

I meticulously strategize & execute website development initiatives, translating conceptual ideas into functional web presences. I provide clients with informed recommendations on web hosting service providers tailored to their specific needs. My responsibilities extend to ensuring an updated & seamless user experience (UX) & interface (UI) as part of my commitment to delivering high-quality digital solutions.

JUNIOR IT TECHNICIAN

June 2022 – 2023 / The Adamjee Group

I created PowerShell scripts as part of my responsibilities in managing Intune policies, Software deployment via Microsoft intune, SharePoint sites, & Microsoft Azure Active Directory across seven tenants/companies within the Adamjee Group of companies. I also responded to user support requests,
